# Insights from Malaria Affect in Africa Dashboard

: A good title can go a long way and make your work look more professional :) Well done!
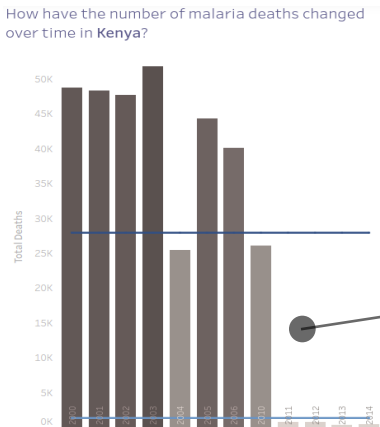

1

Kenya is the most affected by malaria causing average number of 76 deaths every day. The Africa map showed Kenya to be highly affected by Malaria

Kenya
Average deaths every year: 27,896
Average deaths every day: 76.43

: Kenya was one of the most affected countries but managed to solve the situation. Why/how? You could have gone a bit deeper with some research and cited sources. If you're interested: http://www.who.int/features/2017/vector-control-kenya/en/
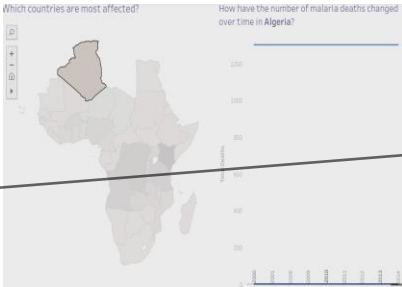

2

Deaths per year due to malaria in Kenya was reduced from 2011, due to efforts of government and sensitization among people. Whereas Kenya faced bad time during 2003 where more than 50k people were dead as they were struck due to malaria which can be seen from that dashboard, I clicked on Kenya on the map, this showed deaths due to malaria each year from 2000 to 2014.

How have the number of malaria deaths changed over time in **Kenya**?

: It's good to see that you added screenshots to support your insights!
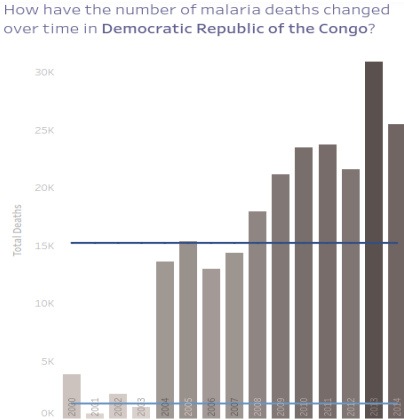

3

Whereas Algeria had the least number of deaths caused by malaria, can be seen in on clicking on the Africa map, reasons can be less population or climatic conditions which caused less breed in mosquitos.

Which countries are most affected?   How have the number of malaria deaths changed over time in **Algeria**?

: Why is there such a big difference between death rates in North and Central Africa? Have you seen a satellite map of the continent?

4

Most of the countries in Africa were seen to be less affected by malaria after 2011 , but Democratic republic of Congo was getting more affected and causing more deaths as seen on clicking on the map and focusing on Democratic republic of Congo.

How have the number of malaria deaths changed over time in **Democratic Republic of the Congo**?

: Tableau is a very powerful and flexible tool. You will learn how to use it later in the program, so keep this dashboard in your mind for future inspiration :)
