Analyzing Music SQL Database

-By Rinki Nag

# Which is most popular Genre sold?

Tracks sold by genere
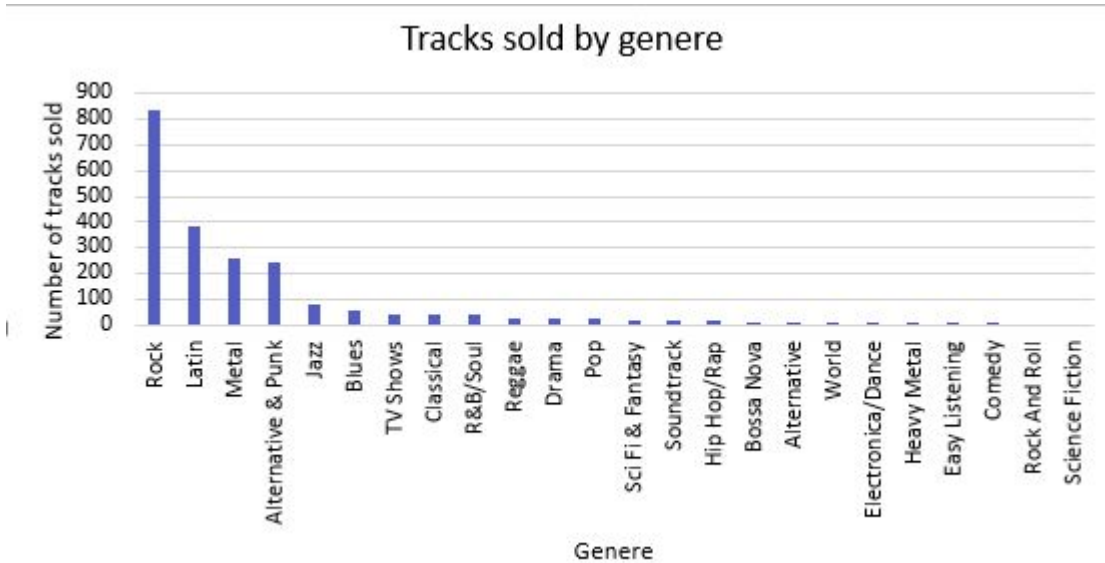

- We can see Rock genre is most famous and after Rock Latin is most sold Genre
- Rock Genre music has highest number of albums sold which is more than 800 which is double the track sold in Latin

: Good job, this is correct!

: Nice work, this chart is complete.

# Which country is Fan of Rock Music ?

Rock genre most sold

- We can see USA is on the top of buying Rock albums
- We can say USA people love to listen Rock music
- Next to USA comes CANADA with almost 25 % less sales in Rock music albums

: Suggestion: This should have been "The number of tracks/songs sold". There are only 347 albums sold in the database, and the your query did not join the album table.

# Which are top 5 sold albums between 2010 -12 ?

: Well done filtering the data to the year details!

Greatest sales of album between 2010 -11
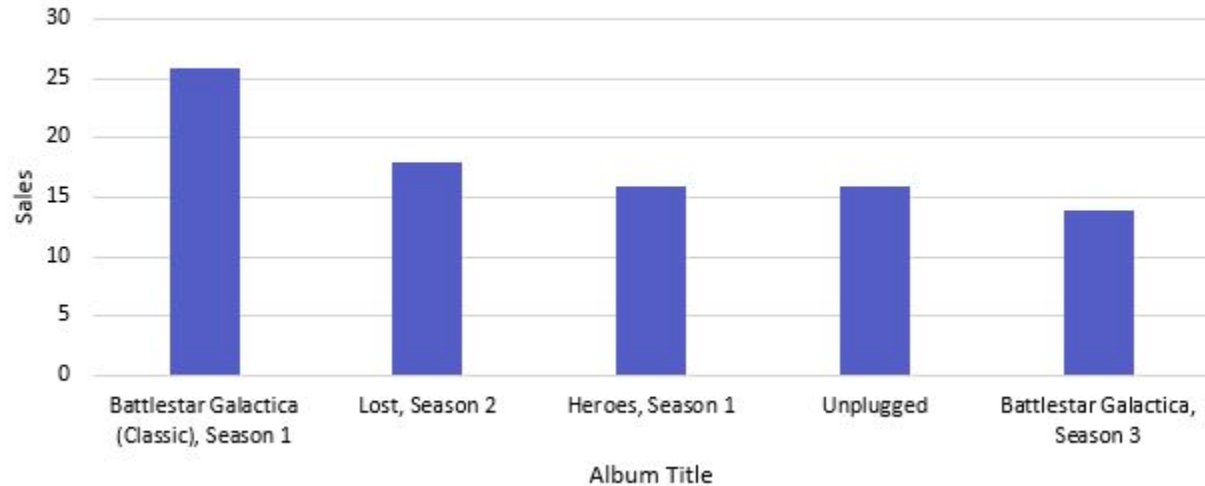

- We can see Battlestar Galactica (Classic), Season 1 is the highest and most probably the famous album between listeners between 2010-12
- All the other albums follows it with minimum decrease of sales of 20%.

Which was the most shared media type between 2010-13 ?

Most used Media type

0.06%   0.04%

8.95%

14%

77%

- MPEG audio file
- Protected MPEG-4 video file
- Protected AAC audio file
- Purchased AAC audio file
- AAC audio file

- We can see the Mpeg is the format most used by users covering max area
- Second most famous is MPEG-4 video file
- May be mpeg audio can be shared without using more kb of data so has become favorite music file type to be shared

: Good job fixing your chart and adding the percentages!
